

DERANGULA AKHILA

AI & Machine Learning Engineering Student

■ 90638 90099 | ✉ derangulaakhila125@gmail.com | Vijayawada

Professional Summary

• Motivated third-year Artificial Intelligence & Machine Learning student with a CGPA of 8.75. Strong foundation in Python, SQL, HTML, CSS, JavaScript and Machine Learning fundamentals. Passionate about software development and AI, with a keen interest in solving real-world problems through technology. Seeking a challenging internship to enhance technical skills while contributing to impactful projects.

Education

- B.Tech – Artificial Intelligence & Machine Learning, NRI Institute of Technology (3rd Year) | CGPA: 8.75
- Intermediate (MPC): 94.3%
- SSC: 89.66%

Technical Skills

- Python
- C (Basics), Java (Basics)
- HTML, CSS, JavaScript
- SQL & MySQL
- Object-Oriented Programming (Basics)
- Data Structures (Basics)
- Git & GitHub (Basics)
- VS Code
- Machine Learning Fundamentals

Academic Projects

- **AgriConnect – Smart Agriculture Platform:** Designed and developed a full-stack agriculture platform to connect farmers directly with customers while integrating delivery drivers and cold-storage providers into a single ecosystem. Planned secure authentication, role-based dashboards, product management, order tracking, market-price updates, and cold-storage booking. The project focuses on reducing dependency on middlemen, improving farmer income, minimizing food wastage, and enabling a transparent farm-to-customer supply chain.
- **AI-Based Landmine Detection System:** Developed a machine learning model using image datasets to identify landmines. Performed data preprocessing, feature extraction, model training, testing, and performance evaluation to improve detection accuracy for autonomous surveillance systems.
- **Vice Bridge AI – Voice Assistant:** Built a voice-enabled assistant for city navigation using speech recognition and intelligent response generation to provide accessible destination guidance and improve the user experience.

Hobbies

- Learning new technologies and AI tools
- Building software projects
